DNA SAMPLE PROVIDED

Hair (see instructions below)

Hair Collection Guidelines:

- Pull at least 40 hairs from a clean/dry tail with visible hair roots (follicles)
- Position all hair roots / follicles together at one end
- Secure with adhesive tape wrapped on the shaft approximately one inch from the hair roots / follicles
- Attach sample to the application below

To prevent cross contamination, when submitting more than one sample ensure that each sample is in a separate envelope.
